Introduction

This is the simple page that shows a number of bootstrap components and the styles that enhance plain HTML content – while also supporting a responsive display (screen resizing).

Firstly, at the top of the page, within a cheader>.../header> section, it is common to have the navigation and some form of banner / heading content. Here we have a list using the
Bootstrap cmponent in a container with five links to different parts of the webpage, with a blue (bg_primary) background and white (text-white) text. While a second
container-fluid with a light blue (bg_primary-subtle) holds the banner details in a centred column of width 8 (col-sn-8 mx-auto text-center py-5) and comprising a title of the page
and leading sentence.

The final section is a <code><footer>...</footer></code>

Note that each section has a <u>hyperlink</u> to the Top of the document for navigation.

Hat Usage Data

In this section of the page, we have a nice table with some data from a survey conducted in 2013 as published in the paper <u>A study on Hat User Habits and Their Perception of the Product Form</u>. The table below is styled with the bootstrap classes table table-striped-columns table-hover, and the table-primary applied to the table header thead. Some rows in the table also use the colspan control. Note, the table also includes a caption and is constrained to 10 columns on wider screens and all 12 columns on small screens (i.e., col-nd-10 col-12 mx-auto).
