Australia: Passenger Traffic at Airports

Reference:

- **Researcher:**Christopher Hughes

  Australia and New Zealand researcher specializing in retail and trade, consumer goods and FMCG, the internet (including e-commerce), media and advertising as well as transportation and logistics. Since joining Statista, he has focused on the burgeoning craft beer and wine industries and associated retail operations in Australia. He has also produced dossiers on freight and passenger aviation, providing international and domestic context for an ever-changing market.
